NEW QUESTION: 1

A company deploys F5 load balancers to manage number of secure applications. The company needs to centrally manage certificates.

Which F5 product provides this functionality?

- A. GTW
- B. LTM
- C. BIG IQ
- D. iHeath

Answer: C

NEW QUESTION: 2

The command shown here does which of the following: Command:
|outputlookup products.csv

- A. Writes search results to a file named products.csv
- B. Returns the contents of a file named products.csv

Answer: A

NEW QUESTION: 3

You have a SharePoint Server 2010 Service Pack 1 (SP1) Web application that has the URL http://portal.contoso.com. You have a site collection that has a top-level site named http://portal.contoso.com.

The site collection administrator deletes http://portal.contoso.com.

You need to restore only the http://portal.contoso.com site collection from the last backup of the farm.

What should you do first?

- A. Run stsadm.exe and specify the -export option.
- B. Restore the hosting content database to a new location.
- C. Restore the hosting Web application to the current Web application location.
- D. Run the restore-spsite cmdlet.

Answer: D

Explanation:

To do site restores the syntax is almost just as easy. You will need to use the same SharePoint 2010 Management Shell as doing the backup. Restore-SPSite -Identity SiteCollectionURLHere -Path BackupFilePathHere [-DatabaseServer DatabaseServerNameHere] [-DatabaseName ContentDatabaseNameHere] [-HostHeader HostHeaderHere] [Force] [-GradualDelete] [-Verbose] DatabaseServer - Specify the server for the content database DatabaseName - Specify the name of the content database HostHeader - URL of the Web application that will hold the host-named site collection Force - Overwrite the site collection if it exists GradualDelete - Recommended for site collections over 1 Gig in size, existing data is marked as deleted and gradually removed over time by a job rather than all at once to reduce the performance hit of deleting large amounts of data
