**NEW QUESTION: 3**

Scenario:

Currently, many users are experiencing problems using their AnyConnect NAM supplicant to login to the network. The network support staff have already examined and verified the AnyConnect NAM configuration is correct.

In this simulation, you are tasked to examine the various ISE GUI screens to determine the ISE current configurations to help isolate the problems. Based on the current ISE configurations, you will need to answer three multiple choice questions.

To access the ISE GUI, click on the ISE icon in the topology diagram to access the ISE GUI.

Not all the ISE GUI screens are operational in this simulation and some of the ISE GUI operations have been reduced in this simulation.

Not all the links on each of the ISE GUI screens work, if some of the links are not working on a screen, click Home to go back to the Home page first. From the Home page, you can access all the required screens.

To view some larger GUI screens, use the simulation window scroll bars. Some of the larger GUI screens only show partially but will include all information required to complete this simulation.

Determine which can be two reasons why many users like the Sales and IT users are not able to authenticate and access the network using their AnyConnect NAM client with EAP-FAST. (Choose two.)

- A.** Many of the fT Sales and fT user machines are not passing the ISE posture assessment.
  - B.** The rr\_Corp authorization profile has the wrong Access Type configured.
  - C.** he PERMr\_all\_TRAFFIC DACL is missing the permit ip any any statement at the end.
  - D.** The Dot1X authentication policy is not allowing the EAP-FAST protocol.
  - E.** The order for the MAB authentication policy and the Dot1X authentication policy should be reversed.
  - F.** The authorization profile used for the Sales users is misconfigured.
  - G.** The Employee\_FullAccess\_DACL DACL is missing the permit ip any any statement in the end.
- Answer: D,E**
