### **2023 Realistic JN0-231 Valid Dumps Sheet Help You Pass JN0-231 Easily**

If you are sure you have learnt all the JN0-231 exam questions, you have every reason to believe it, I didn't even need any other study material, Our JN0-231 exam prep file has won good reputation among numerous candidates and peers in the industry through continuous JN0-231 innovation and creation.

You can practice the questions on practice software in APP real JN0-231 exam scenario or you can use simple Dumps PDF format to go through all the real JN0-231 exam questions.

You will also get to know that how will your knowledge be tested and what can be the exam pattern, We have online and offline service, and if you have any questions for JN0-231 training materials, don't hesitate to consult us.

I noticed that they update the materials very [Security, Associate \(JNCIA-SEC\)](#) frequently, But we have a service warranty for you, Tinova-Japan deeply believe that our latest JN0-231 exam torrent will be very useful for you to strength your ability, pass your JN0-231 exam and get your certification.

Our JN0-231 valid practice questions have three different versions, including the PDF version, the software version and the online version, to meet the different needs, our JN0-231 study materials have many advantages, and you can free download the demo of our JN0-231 exam questios to have a check.

### **Essential Guide for Complete Review of JN0-231 Valid Dumps Sheet**

It is interesting to study with our JN0-231 exam questions, Your hard work and a comprehensive exam preparation method guide you towards success, Most candidates want to pass Juniper exam but couldn't find the best way to prepare it.

Three versions: PDF version, SOFT (PC Test Engine), APP (Online Test Engine), No need to register an account yourself, Our actual JN0-231 test braindumps guarantee you 100% pass exam certainly.

The best reason for choosing our JN0-231 exam torrent as your training materials is its reliability and authenticity, JN0-231 cram sheet pdf free download to learn more about Security, Associate (JNCIA-SEC).

If you prepare for the exams using our Tinova-Japan [A00-470 Valid Test Tips](#) testing engine, It is easy to succeed for all certifications in the first attempt, We believe professionals and executives **Valid Dumps JN0-231 Sheet** alike deserve the confidence of quality coverage these authorizations provide.

#### **NEW QUESTION: 1**

Your company's security policy states that all of the servers deployed to a branch office must not have the graphical user interface (GUI) installed. In a branch office, a support technician installs a server with a GUI installation of Windows Server 2012 R2 on a new server, and then configures the server as a DHCP server.

You need to ensure that the new server meets the security policy. You want to achieve this goal by using the minimum amount of administrative effort.

What should you do?

- A.** From Windows PowerShell, run `Uninstall-WindowsFeature Desktop-Experience`.
- B.** Reinstall Windows Server 2012 R2 on the server.
- C.** From Server Manager, uninstall the User Interfaces and Infrastructure feature.

D. From Windows PowerShell, run Uninstall-WindowsFeature PowerShell-ISE.

**Answer: C**

### **NEW QUESTION: 2**

A banking business running background storage system requirements are as follows:

(1) Business Impact. The business impact generated by the operating system is about 100KB.

(2) The service operation system is the whole GE network. The server and operating system are GE network.

Follow-up to consider the business needs to upgrade to 10GE.

(3) Only requires 72TB of total space, the latter expansion priority to expand the disk

(4) Only 20U of rack space is reserved for the current storage devices.

The configuration of three nodes and switches is prioritized to meet the requirements of the machine room.

Cabinet planning based on the above requirements.

What are the more appropriate networking solutions?

**A.** Scenario 2: 3 \* Oceanstor 9000 C Node36 \* 2TB SATA hard drive; 2 \* Front-end GE + back-end 2 \* 10GE

**B.** program three: 3 \* OceanStor 9000 P Node36 \* 2TB SAS configuration 2 \* Front-end GE + 2 \* Rear-end 10GE

**C.** Program One: 1 \* OceanStor 9000 C Node36 \* 2TB SATA configuration 2 \* Front-end GE + 2 \* Rear-end 10GE

**D.** Program Four: 3 \* OceanStor 9000 M Node36 \* 2TB SAS configuration 2 \* Front-end GE + 2 \* Rear-end 10GE

**Answer: B**

### **NEW QUESTION: 3**

Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described

in the case study. Each question is independent of the other question on this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Background

Alpine Skihouse designs and manufactures skis and ski accessories. The corporate headquarters for the company is located in London. The company has a design office in Rome and sales offices in Paris, Los Angeles, and Boston. The design team director works in the Rome office.

The company plans to implement Skype for Business Server 2015 to address their unified communications needs. The company currently has traditional PBX implementations in each office location and uses a dial-in conferencing system that is hosted on their internal PBX.

The number of users in each office is shown in the following table:

Remote connectivity to all corporate resources and services is provided by SSL virtual private network (VPN) only. The current VPN solution tunnels all traffic to the office. Internet facing services cannot be reached directly from users' laptops when they are traveling.

Problem statements

During the requirements gathering process for the Skype for Business deployment project, users reported the following issues:

Users based in the United States report that they experience poor audio and video quality when they

conduct meetings with users that are not located in the United States.

Users based in the United States report that they experience poor audio and video quality when they

conduct meetings and calls while they remotely connected to the office.

The design team director would like customers to be greeted in the Italian language when they use dial-

in conferencing to join meetings.

The sales team director organizes daily alignment meetings with local sales teams. He reports that

there are issues with the quality of the audio and video.

Proposed solution

London

The following table shows the proposed London Skype for Business Server 2015 server architecture and IP addresses:

The following table shows the proposed Rome Skype for Business Server 2015 server architecture and IP addresses:

Los Angeles

The following table shows the proposed Los Angeles Skype for Business Server 2015 server architecture and IP address:

Requirements

Business requirements

The company has identified the following business requirements:

Users must be able to access all Skype for Business services when they work remotely.

The solution must support meetings with up to 10,000 users.

The solution must be highly available, and must withstand the loss of a single component at any point

in time with as little interruptions of service as possible.

The language used by Skype for Business services must be localized wherever possible.

The leadership team in the Americas regions hosts an All Hands meeting for all employees four times

per year. All employees are requested to join this meeting. You must not install any additional servers to support this requirement.

Technical requirements

The company has identified the following technical requirements:

The SQL team has completed an upgrade of the entire SQL Server to the latest version. They require

every SQL Server to use a SQL AlwaysOn Availability Group as the high availability (HA) option.

There is no data center within the Boston site.

You must use the secondary data center in London to minimize the impact to users in the event of a

single-site disaster.

Media traffic must only be encrypted once.

You must use the Skype for Business Management  
ShellInvoke-CsComputerFailOverandInvoke-

CsComputerFailBackcmdlets to perform maintenance actions during  
daily operations.

You must implement DomainName System (DNS) load balancing  
wherever possible.

The London site facilities had a power issue that prevented  
users from accessing any service in the data center.

You need to review the proposed design so that Skype for  
Business will be resilient to this kind of issue.

You need to plan the solution.

What should you do?

- A.** Deploy an additional Front End server on the London Front  
End pool.
- B.** Deploy a Standard Edition server in the London Site and pair  
it with the primary Front End pool.
- C.** Deploy an additional Front End pool in the London Site and  
pair it with the primary Front End pool.
- D.** Deploy an additional Front End pool in the available  
secondary site and pair it with the primary Front End pool.
- E.** Deploy an additional Front End pool in the secondary site  
and pair it with the primary Front End pool.  
Split the users between the pools.

**Answer: E**

#### **NEW QUESTION: 4**

Before upgrading SecurePlatform to GAIa, you should create a  
backup. To save time, many administrators use the command  
backup. This creates a backup of the Check Point configuration  
as well as the system configuration.

An administrator has installed the latest HFA on the system for  
fixing traffic problem after creating a backup file. There is a  
mistake in the very complex static routing configuration. The  
Check Point configuration has not been changed. Can the  
administrator use a restore to fix the errors in static  
routing?

- A.** The restore is not possible because the backup file does not  
have the same build number (version).
- B.** The restore can be done easily by the command restore and  
copying netconf.C from the production environment.
- C.** A backup cannot be restored, because the binary files are  
missing.
- D.** The restore is done by selecting Snapshot Management from  
the boot menu of GAIa.

**Answer: B**
