NEW QUESTION: 1
Universal Containers' support management team has noticed an increase in wait times over the last several months when customers call in for support. Which two recommendations should a Consultant suggest to help decrease customer wait times?
Choose 2 answers
A. Set up analytical snapshots to capture key case information and create historical trending reports.
B. Set up a Salesforce Customer Community that will allow customers to create cases online.
C. Create reports to analyze call data in order to understand peak times and ensure adequate staffing.
D. Create a case escalation rules to route high-priority cases directly to supervisors for resolution.
Answer: B,C

NEW QUESTION: 2
You are authoring unit tests.
The unit tests must test code that consumes sealed classes.
You need to create, maintain, and inject dependencies in the unit tests.
Which isolation method should you use?
A. T4 text templates and code generation
B. Stub types
C. Shim types
D. Hard-coded implementation
Answer: C
Explanation:
Explanation
Shim types are one of two technologies that the Microsoft Fakes Framework uses to let you easily isolate components under test from the environment. Shims divert calls to specific methods to code that you write as part of your test. Many methods return different results dependent on external conditions, but a shim is under the control of your test and can return consistent results at every call. This makes your tests much easier to write.
