With the help of our H12-421-CN study questions, you can reach your dream in the least time.

NEW QUESTION: 1
The Department Manager has created an organization goal "Improve Organization Sales".
The goal is assigned to all the workers who fall under the organization hierarchy. The goal- setting process is competed across the organization. At the midpoint of the goal period, the
Department Manager would like to know if the workers in his or her organization are achieving the goals that are aligned to the organization's goal "Improve Organization
Sales".
How can the manager see the desired information?
A. Create a new dashboard report on the Organization Goals page.
B. View either the Goal Alignment Summary report or the Goal Progress Summary report.
C. View the Goal Progress Summary report.
D. View the Goal Alignment Summary report.

E. Create a new dashboard report on the My Goals page.
Answer: C

NEW QUESTION: 2
HOTSPOT
You need to configure the solutions.
For each solution, which protocol should you use?

Answer:
Explanation:

NEW QUESTION: 3
An IS auditor finds that a DBA has read and write access to
production data. The IS auditor should:
A. review user access authorizations approved by the DBA.
B. recommend the immediate revocation of the DBA access to
production data.
C. accept the DBA access as a common practice.
D. assess the controls relevant to the DBA function.
Answer: D
Explanation:
Explanation/Reference:
Explanation:
It is good practice when finding a potential exposure to look
for the best controls. Though granting the database
administrator (DBA) access to production data might be a common
practice, the IS auditor should evaluate the relevant controls.
The DBA should have access based on a need-to-know and need-
to-do basis; therefore, revocation may remove the access
required. The DBA, typically, may need to have access to some
production data. Granting user authorizations is the
responsibility of the dataowner and not the DBA.

NEW QUESTION: 4
DRAG DROP
You have a deployment of System Center Configuration Manager
(Current Branch).
You configure hybrid mobile device management (MDM).
You use Configuration Manager to manage Apple iOS and Android
devices.
You need to prevent users of the devices from incurring roaming
data charges.
What should you configure for each device? To answer, drag the
appropriate configurations to the correct devices. Each
configuration may be used once, more than once, or not at all.
You may need to drag the split bat between panes or scroll to

view content.
NOTE: Each correct selection is worth one point.
