Explanation:

Explanation

Kinesis Data Streams and Kinesis Client Library (KCL) - Data from the data source can be continuously captured and streamed in near real-time using Kinesis Data Streams.

With the Kinesis Client Library (KCL), you can build your own application that can preprocess the streaming data as they arrive and emit the data for generating incremental views and downstream analysis.

Kinesis Data Analytics - This service provides the easiest way to process the data that is streaming through Kinesis Data Stream or Kinesis Data Firehose using SQL. This enables customers to gain actionable insight in near real-time from the incremental stream before storing it in Amazon S3.

Answer: B

NEW QUESTION: 3

Which application is used to create an asset from an Item Master record?

- A. Assets
- B. IT Asset Classifications
- C. Item Master
- D. Asset Templates

Answer: B

NEW QUESTION: 4

An administrator is replacing the current access switches with AOS-CX switches. The access layer switches must authenticate user and networking devices connecting to them. Some devices support no form of authentication, and some support 802.1X. Some ports have a VoIP phone and a PC connected to the same port, where the PC is connected to the data port of the phone and the phone's LAN port is connected to the switch.

Which statement is correct about this situation?

- A. The client-limit setting for port access needs to be changed
- B. 802.1X must be configured to work in fallback mode

- C. Device mode should be implemented
- D. Device fingerprinting is required for authentication

Answer: B
