Taking its place will be our willingness to use whatever device is in within reach, SAP Certification Exam Material C_C4H320_02 Exam Dumps, Many candidates make compliments to the quality of our SAP Certified Application Associate - SAP Commerce Cloud Business User practice materials.

We have always believed that every user has its own uniqueness, The following study materials will help, Now we will recommend a reliable and authority C_C4H320_02 exam preparation to you.

Our C_C4H320_02 test question with other product of different thing is we have the most core expert team to update our

C_C4H320_02 study materials, learning platform to changes with the change of the exam outline.

In a word, it is up to you to select, Today's businesses require us to **C_C4H320_02 Best Practice** have more skills and require us to do more in the shortest possible time, In fact, all three versions contain the same questions and answers.

Its authority is undeniable, Our test dumps will actually help you pass [C_C4H320_02](#) exams with passing marks surely, All the Topics included in the Exam Course by Vendor are included in the guides by Technical experts.

Free PDF Useful SAP - C_C4H320_02 - SAP Certified Application Associate - SAP Commerce Cloud Business User Best Practice

We offer you free update for one year for C_C4H320_02 exam dumps, and the update version will be sent to your email automatically, When it comes to our time-tested C_C4H320_02 latest practice dumps, for one thing, we have a professional team contains a lot of experts who have devoted themselves to the research and development of our C_C4H320_02 exam guide, thus we feel confident enough under the intensely competitive market.

The most gratifying after service, While the knowledge you study may be not enough to pass the actual test, thus you need some useful study material, such as the C_C4H320_02 examkiller study guide from our site.

Believe it or not, our C_C4H320_02 study materials will relieve you from poverty, Read more, then you will know how significant to choose our C_C4H320_02 training materials.

I can assure you that we will provide considerate on line after sale service about our C_C4H320_02 exam questions for you in twenty four hours a day, seven days a week.

Our company set a lot of principles [Reliable 4A0-C02 Test Duration](#) to regulate ourselves to do better with skillful staff.

NEW QUESTION: 1

You have a computer named Computer1 that runs Windows 7. Computer1 has a shared printer.

You need to configure Computer1 so that only Administrators are authorized to shut down the computer.

What should you do?

- A. From User Accounts, modify the User Account Control (UAC) settings.
- B. From the local computer policy, modify the User Rights Assignment.
- C. From User Accounts, modify the user profiles settings.

adatum.com. The offices connect to each other by using a WAN link that has 5-ms latency. A: Datum standardizes its database platform by using SQL Server 2014 Enterprise edition.

Databases

Each office contains databases named Sales, Inventory, Customers, Products, Personnel, and Dev.

Servers and databases are managed by a team of database administrators. Currently, all of the database administrators have the same level of permissions on all of the servers and all of the databases.

The Customers database contains two tables named Customers and Classifications.

The following graphic shows the relevant portions of the tables:

The following table shows the current data in the Classifications table:

The Inventory database is updated frequently.

The database is often used for reporting.

A full backup of the database currently takes three hours to complete.

Stored Procedures

A stored procedure named USP_1 generates millions of rows of data for multiple reports. USP_1 combines data from five different tables from the Sales and Customers databases in a table named Table1.

After Table1 is created, the reporting process reads data from Table1 sequentially several times. After the process is complete, Table1 is deleted.

A stored procedure named USP_2 is used to generate a product list. The product list contains the names of products grouped by category.

USP_2 takes several minutes to run due to locks on the tables the procedure accesses. The locks are caused by USP_1 and USP_3.

A stored procedure named USP_3 is used to update prices. USP_3 is composed of several UPDATE statements called in sequence from within a transaction.

Currently, if one of the UPDATE statements fails, the stored procedure fails. A stored procedure named USP_4 calls stored procedures in the Sales, Customers, and Inventory databases. The nested stored procedures read tables from the Sales, Customers, and Inventory databases. USP_4 uses an EXECUTE AS clause.

All nested stored procedures handle errors by using structured exception handling. A stored procedure named USP_5 calls several stored procedures in the same database. Security checks are performed each time USP_5 calls a stored procedure.

You suspect that the security checks are slowing down the performance of USP_5. All stored procedures accessed by user applications call nested stored procedures.

The nested stored procedures are never called directly.

Design Requirements

Data Recovery

You must be able to recover data from the Inventory database if a storage failure occurs. You have a Recovery Time Objective (RTO) of 5 minutes.

You must be able to recover data from the Dev database if data is lost accidentally. You have a Recovery Point Objective (RPO) of one day.

Classification Changes

You plan to change the way customers are classified. The new classifications will have four levels based on the number of orders. Classifications may be removed or added in the future. Management requests that historical data be maintained for the previous classifications. Security A group of junior database administrators must be able to manage security for the Sales database. The junior database administrators will not have any other administrative rights. A: Datum wants to track which users run each stored procedure.

Storage

A Datum has limited storage. Whenever possible, all storage space should be minimized for all databases and all backups.

Error Handling

There is currently no error handling code in any stored procedure.

You plan to log errors in called stored procedures and nested stored procedures. Nested stored procedures are never called directly.

You need to recommend a solution to ensure that USP_4 adheres to the security requirements. What should you include in the recommendation?

- A. Enable C2 audit tracing.
- B. Enable trace flags.
- C. Configure data manipulation language (DML) triggers.
- D. Enable SQL Server Audit.

Answer: D

Explanation:

Explanation

Scenario:

A stored procedure named USP_4 calls stored procedures in the Sales, Customers, and Inventory databases.

The nested stored procedures read tables from the Sales, Customers, and Inventory databases. USP_4 uses an EXECUTE AS clause.

Beginning in SQL Server 2008 Enterprise, you can set up automatic auditing by using SQL Server Audit.
