NEW QUESTION: 3

In your role as network security administrator, you have installed syslog server software on a server whose IP address is 10.10.2.40. According to the exhibits, why isn't the syslog server receiving any syslog messages?

- A. There have not been any events with a severity level of seven.
- B. The syslog server has failed.
- C. Logging is not enabled globally on the Cisco ASA.
- D. The Cisco ASA is not configured to log messages to the syslog server at that IP address.

Answer: B

Explanation:

By process of elimination, we know that the other answers choices are not correct so that only leaves us with the server must have failed. We can see from the following screen shots, that events are being generated with severity level of debugging and below, The 10.10.2.40 IP address has been configured as a syslog server, and that logging has been enabled globally:
