D. S3ãƒ•ã‚±ãƒƒãƒ^ã•®1AMãƒãƒªã‚·ãƒ¼ã‚'ä½œæ^•ã•—ã•¾ã•™ã€‚
Answer: B
Explanation:
Explanation
The AWS Documentation mentions the following on lifecycle
policies
Lifecycle configuration enables you to specify the lifecycle
management of objects in a bucket. The configuration is a set
of one or more rules, where each rule defines an action for
Amazon S3 to apply to a group of objects. These actions can be
classified as follows:
Transition actions - In which you define when objects
transition to another . For example, you may choose to
transition objects to the STANDARDJA (IA, for infrequent
access) storage class 30 days after creation, or archive
objects to the GLACIER storage class one year after creation.
Expiration actions - In which you specify when the objects
expire. Then Amazon S3 deletes the expired objects on your
behalf.
Option A and C are invalid because neither bucket policies
neither 1AM policy's can control the purging of logs Option D
is invalid CORS is used for accessing objects across domains
and not for purging of logs For more information on AWS S3
Lifecycle policies, please visit the following URL:
com/AmazonS3/latest/d<
The correct answer is: Configuring lifecycle configuration
rules on the S3 bucket. Submit your Feedback/Queries to our
Experts
