Reliable C-THR87-2205 Guide Dumps: Certified Application Associate - SAP SuccessFactors Variable Pay 1H/2022 - C-THR87-2205 Test Prep Materials - Tinova-Japan

Your success in Exam becomes certain when you try the featured product **Exam C-THR87-2205 Discount** offered by the Tinova-Japan, We are the best certified study guide website which our pass rate is reaching to 99.5% this year.

Are you still feeling stressful to the increasing difficulty of the C-THR87-2205 exam, We will provide one year free update service for those customers who choose Tinova-Japan's products.

Because, we have the merits of intelligent **Exam C-THR87-2205 Discount** application and high-effectiveness to help our clients study more leisurely on our C-THR87-2205 practice questions, Your support and praises of our C-THR87-2205 study guide are our great motivation to move forward.

As the development of information technology and IT industry **Exam C-THR87-2205 Discount** in recent years, the innovation of IT industry become a craze in market, Here you can answer your doubts;

NEW QUESTION: 1
CORRECT TEXT

Answer:

Explanation:

Here is the solution below:

Explanation:

To troubleshoot the problem, first issue the show running-config on all of 4 routers. Pay more attention to the outputs of routers R2 and R3 The output of the "show running-config" command of R2:

The output of the "show running-config" command of R3:

We knew that all areas in an Open Shortest Path First (OSPF) autonomous system must be physically connected to the backbone area (Area 0). In some cases, where this is not possible, we can use a virtual link to connect to the backbone through a non-backbone area. The area through which you configure the virtual link is known as a transit area. In this case, the area 11 will become the transit area. Therefore, routers R2 and R3 must be configured with the area <area id> virtual-link <neighbor router-id> command. + Configure virtual link on R2 (from the first output above, we learned that the OSPF process ID of R2 is

```
1):
R2>enable
R2#configure terminal
R2(config)#ipv6 router ospf 1
R2(config-rtr)#area 11 virtual-link 3.3.3.3
Save the configuration:
R2(config-rtr)#end
R2#copy running-config startup-config
(Notice that we have to use neighbor router-id 3.3.3.3, not R2's router-id 2.2.2.2) +
Configure virtual link on R3 (from the second output above, we learned that the OSPF process ID of R3 is 1 and we have to disable the wrong configuration of "area 54 virtual-link 4.4.4.4"):
```

```
R3>enable
R3#configure terminal
R3(config)#ipv6 router ospf 1
R3(config-rtr)#no area 54 virtual-link 4.4.4.4
R3(config-rtr)#area 11 virtual-link 2.2.2.2
Save the configuration:
R3(config-rtr)#end
R3#copy running-config startup-config
```

You should check the configuration of R4, too. Make sure to remove the incorrect configuration statements to get the full points.

```
R4(config)#ipv6 router ospf 1
R4(config-router)#no area 54 virtual-link 3.3.3.3
R4(config-router)#end
```

After finishing the configuration doesn't forget to ping between R1 and R4 to make sure they work.

Note. If you want to check the routing information, use the show ipv6 route command, not "show ip route".

NEW QUESTION: 2

An administrator notices that nothing is being archived during scheduled archiving.

However, users are able to archive manually from Outlook.

What should the administrator check first to ensure items are archived during scheduled archiving?

- A. the Maximum number of items per target per pass is set to 1000
- B. the Mailbox Archiving task has Report mode unchecked
- C. the Provisioning task is running
- D. the "Initially Suspend Archiving" is unchecked in the provisioning group

Answer: B

NEW QUESTION: 3

What are the benefits of using the SQL Monitor (transaction SQLM)?

There are 2 correct answers to this question.

Response:

- A. It can be active in a production system with minimal performance overhead.
- B. It collects monitoring data asynchronously without additional database interaction.
- C. It schedules ABAP programs to monitor and log all database accesses.
- D. It displays the database execution plan for all SQL statements.

Answer: A,B

NEW QUESTION: 4

ABC.com, the GL accountant comes to you and says that she is running the tests to check budget functionality. She says that the GL period is closed, but she was able to post the budget journal in a closed period. You check the setups and confirm that the GL period in which Tess was able to post the budget journal is closed. What explanation do you provide to Tess?

- A. The budget year is Open.
- B. The Profile option Require Budget Journal is set at the set of books level.
- C. The budget status is Frozen.
- D. The budget status is Current.

Answer: A
