So, with the Salesforce Platform APP Builder DEX-403E valid free torrent, you will not waste precious studying time filling your head with useless information, Latest & valid exam dumps.

If you use Tinova-Japan's training program, you can 100% pass the exam, Get the best DEX-403E exam Training, You can install our Salesforce DEX-403E valid torrent on your computer or other device as you like without any doubts.

Your reasons for selecting the leader in online DEX-403E preparation - Tinova-Japan, So download immediately after payment is another outstanding advantage of Salesforce DEX-403E dumps.

Selecting shortcut and using technique are to get better success.

NEW QUESTION: 1

Which command can be used to validate a Captive Portal policy?

- A. request cp-policy-eval <criteria>
- B. test cp-policy-match <criteria>
- C. eval captive-portal policy <criteria>
- D. debug cp-policy <criteria>

Answer: B

NEW QUESTION: 2

Your company has a main office and a branch office. The main office is located in Seattle. The branch office is located in Montreal. Each office is configured as an Active Directory site.

The network contains an Active Directory domain named adatum.com. The Seattle office contains a file server named Server1. The Montreal office contains a file server named Server2.

The servers run Windows Server 2012 R2 and have the File and Storage Services server role, the DFS Namespaces role service, and the DFS Replication role service installed.

Server1 and Server2 each have a share named Share1 that is replicated by using DFS Replication.

You need to ensure that users connect to the replicated folder in their respective office when they connect to \\adatum.com\Share1.

Which three actions should you perform? (Each correct answer presents part of the solution. Choose three.)

- A. Create a namespace.
- B. Create a replication connection.
- C. Share and publish the replicated folder.
- D. Modify the Referrals settings.
- E. Create a new topology.

Answer: A,C,D

Explanation:

Explanation/Reference:

Explanation:

To share a replicated folder and publish it to a DFS namespace Click Start, point to Administrative Tools, and then click DFS Management. In the console tree, under the Replication node, click the replication group that contains the replicated folder you want to share. In the details pane, on the Replicated Folders tab, right-click the replicated folder that you want to share, and then click Share and Publish in Namespace. In the Share and Publish Replicated Folder Wizard, click Share and publish the replicated folder in a namespace, and then follow the steps in the wizard.

Note that: If you do not have an existing namespace, you can create one in the Namespace Path page in the Share and Publish Replicated Folder Wizard. To create the namespace, in the Namespace Path page, click Browse, and then click New Namespace.

To create a namespace

Click Start, point to Administrative Tools, and then click DFS Management.

In the console tree, right-click the Namespaces node, and then click New Namespace.

Follow the instructions in the New Namespace Wizard.

To create a stand-alone namespace on a failover cluster, specify the name of a clustered file server instance on the Namespace Server page of the New Namespace Wizard.

Important

Do not attempt to create a domain-based namespace using the Windows Server 2008 mode unless the forest functional level is Windows Server 2003 or higher. Doing so can result in a namespace for which you cannot delete DFS folders, yielding the following error message: "The folder cannot be deleted.

Cannot complete this function."

To share a replicated folder and publish it to a DFS namespace Click Start, point to Administrative Tools, and then click DFS Management.

In the console tree, under the Replication node, click the replication group that contains the replicated

folder you want to share.

In the details pane, on the Replicated Folders tab, right-click the replicated folder that you want to

share, and then click Share and Publish in Namespace.

In the Share and Publish Replicated Folder Wizard, click Share and publish the replicated folder in a

namespace, and then follow the steps in the wizard.

"You need to ensure that users connect to the replicated folder in their respective office when they connect to \\contoso.com\Share1."

NEW QUESTION: 3

There have been question in your organization about adding supplemental data to the campaign tracking codes. What are three available methods for adding metadata to campaigns codes? Select three.

- A. Import file through browser import
- B. Use the classification rule builder
- C. Configure auto classification in report suite settings
- D. Import file through campaign data utility
- E. Import file through FTP import

Answer: A,D,E

NEW QUESTION: 4

DRAG DROP

You are validating user input by using JavaScript and regular expressions.

A group of predefined regular expressions will validate two input fields:

An email address in a function named validateEmail (for example, [\[email#160;protected\]](#)) A nine-digit number that allows optional hyphens after the second and fifth character in a function named validateSSN(for example, 555555555 or 555-55-5555) You need to use the correct expression to validate the input.

Which expression should you insert into each function? (To answer, drag the appropriate regular expression statement to the correct location. Each regular expression statement may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)
