- D. 42.3

Answer: A

Explanation:

Explanation/Reference:

Explanation:

CCC = (Average receivables collection period) plus (Average inventory processing time) minus (Average payables payment period).

Hence, $31.6 = \text{Average receivables collection period} + 43.1 - 23.2$, giving Average receivables collection period = $31.6 - 43.1 + 23.2 = 11.7$ days. Since Average receivables collection period = $365/\text{receivables turnover}$, the receivables turnover ratio equals $365/11.7 = 31.2$.
