NEW QUESTION: 1

DRAG DROP

You administer Windows 7 and Windows 10 Enterprise computers. You run an application that saves files that contain local settings unique to each user.

You want to allow users to synchronize settings for an application to any enterprise computer when they log on to the enterprise computer.

You need to implement a solution that will move a user's settings files to any computer. You also need to ensure that you can roll back the changes if necessary.

Which required task or tasks should you perform with each approach? To answer, drag the appropriate required task to the corresponding approach. Each required task may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer: C

NEW QUESTION: 3

Scenario:

CGE acquires a small energy company that is running MGMT, a proprietary 16-bit application. A Citrix Architect is tasked with deploying this application to the Executives/Management end-user group. The CIO mandates that a FlexCast model must be chosen that resembles this end-user group's existing delivery strategy.

It is important that a single-image deployment is utilized and that management effort is kept to a minimum for the update process. The availability of a fast rollback plan must also be available after upgrades, since it can often result in system instability.

Why is deploying MGMT in a Hosted Shared environment on Windows Server 2008 R2 with Machine Creation Services the best solution?

- A. End users are already comfortable working in a shared environment.
- B. It prevents XenApp server crashes.
- C. It enables faster rollbacks.
- D. It offers a faster change process.

Answer: D
