It is a great service, You can try the demos Valid AD0-E501 Exam Cost first and find that you just can't stop studying, The Strength & Power of Our Company.

NEW QUESTION: 1

Adam works as a Security Administrator for Umbrella Technology Inc. He reported a breach in security to his senior members, stating that "security defenses has been breached and exploited for 2 weeks by hackers." The hackers had accessed and downloaded 50,000 addresses containing customer credit cards and passwords. Umbrella Technology was looking to law enforcement officials to protect their intellectual property. The intruder entered through an employee's home machine, which was connected to Umbrella Technology's corporate VPN network. The application called BEAST Trojan was used in the attack to open a "back door" allowing the hackers undetected access. The security breach was discovered when customers complained about the usage of their credit cards without their knowledge. The hackers were traced back to Shanghai, China through e-mail

address evidence. The credit card information was sent to that same e-mail address. The passwords allowed the hackers to access Umbrella Technology's network from a remote location, posing as employees.

Which of the following actions can Adam perform to prevent such attacks from occurring in future?

- A. Allow VPN access but replace the standard authentication with biometric authentication.
- B. Disable VPN access to all employees of the company from home machines
- C. Replace the VPN access with dial-up modem access to the company's network.
- D. Apply different security policy to make passwords of employees more complex.

Answer: B

NEW QUESTION: 2

A company uses Dynamics 365 for Sales. The company has not made changes to any of the default security roles.

You need to ensure that users can assign salespeople to sales territories.

Which security role can you use?

- A. Delegate
- B. Marketing Professional
- C. Sales Person
- D. CEO - Business Manager

Answer: D

Explanation:

NEW QUESTION: 3

Your EMR job processes a single 2 TB data file stored on Amazon Simple Storage Service (S3).

The EMR job runs on two On-Demand core nodes and three On-Demand task nodes. What can you do to reduce the time it takes for the job to complete? Choose the correct answer:

- A. Use a VPC to launch the core and task nodes
- B. Use versioning on the S3 bucket.
- C. Adjust the number of simultaneous mapper tasks.
- D. Use spot instances instead of on-demand for the core nodes

Answer: C

Explanation:

When your cluster runs, Hadoop creates a number of map and reduce tasks. These determine the number of tasks that can run simultaneously during your cluster. Run too few tasks and you have nodes sitting idle; run too many and there is significant

framework overhead.
