We never satisfy the achievements at present, and just like you, we never stop the forward steps, However, if you choose right C_THR87_2111 sure pass test, you will find C_THR87_2111 torrent training is totally close to you in fact.

NEW QUESTION: 1

Refer to exhibit: Which destination addresses will be used by Host A to send data to Host C? (Choose two.)

- A. the MAC address of Host C
- B. the MAC address of the router's E0 interface
- C. the IP address of Switch 1
- D. the IP address of the router's E0 interface
- E. the MAC address of Switch 1
- F. the IP address of Host C

Answer: B,F

Explanation:

Explanation/Reference:

Explanation:

While transferring data through many different networks, the source and destination IP addresses are not changed. Only the source and destination MAC addresses are changed. So in this case Host A will use the IP address of Host C and the MAC address of E0 interface to send data. When the router receives this data, it replaces the source MAC address with it own E1 interface's MAC address and replaces the destination MAC address with Host C's MAC address before sending to Host C.

NEW QUESTION: 2

You need to ensure that data security requirements are met. What should you do?

- A. Enable Role-Based Access Control (RBAC) for each database.
- B. Ensure that all applications use Cosmos DB secondary master keys.
- C. Use Azure Key Vault HSM for encrypting the results of the analysis
- D. Generate Cosmos DB resource tokens for each collection.

Answer: D

Explanation:

Explanation/Reference:

Explanation:

Resource tokens provide access to the application resources within a database. Resource tokens:

Provide access to specific collections, partition keys, documents, attachments, stored procedures, triggers, and UDFs. Are created when a user is granted permissions to a specific resource.

You can use a resource token (by creating Cosmos DB users and permissions) when you want to provide access to resources in your Cosmos DB account to a client that cannot be trusted with the master key.

Scenario: Security and Personally Identifiable Information (PII)

Access to the analysis results must be limited to the specific customer account of the user that

originally uploaded the documents.
