NEW QUESTION: 1

You plan to deploy a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You need to recommend a solution for My Site to meet the following requirements:

The My Sites of users in the sales department must have URLs that start with `http://sales.contoso.com/` users.

All other My sites must have URLs that start with `http://intranet.contoso.com/mysites`.

What should you include in the recommendation?

- A. two User Profile service application and two managed paths
- B. two User Profile service application and two managed paths
- C. one User Profile service application and one managed paths
- D. one User Profile service application and two managed paths

Answer: B

Explanation:

Section: Various

Explanation/Reference:

MySite URL is a setting on user profile SA level, so setting two URLs will require two service applications. And because both URLs will also require a managed path to deploy the sites to, you need two of those.
