Explanation:

NEW QUESTION: 2
Joe, a security analyst, asks each employee of an organization to sign a statement saying that they understand how their activities may be monitored. Which of the following BEST describes this statement? (Select TWO).
A. Acceptable use policy

- B. Security policy
- C. Email policy
- D. Risk acceptance policy
- E. Privacy policy

Answer: A,E

Explanation:

Privacy policies define what controls are required to implement and maintain the sanctity of data privacy in the work environment. Privacy policy is a legal document that outlines how data collected is secured. It should encompass information regarding the information the company collects, privacy choices you have based on your account, potential information sharing of your data with other parties, security measures in place, and enforcement.

Acceptable use policies (AUPs) describe how the employees in an organization can use company systems and resources, both software and hardware.

Incorrect Answers:

B. Risk Acceptance policy refers to the choice that must be made when the cost of implementing any of the choices exceeds the value of harm that would occur if the risk actually came to happen.

D. Email is not bound to any one type of policy when it comes to risk mitigation, etc. email policy and regulations can be found in acceptable use policy as well as privacy policy which best describes what Joe is doing.

E. Security policies define what controls are required to implement and maintain the security of systems, users, and networks.

NEW QUESTION: 3

What is the purpose of creating a Tracker subdomain? [Choose one answer]

- A. All of the above
- B. To host all Pardot landing pages and forms on your website
- C. To allow emails to be sent from your domain
- D. To give a seamless transition between pages and form that you host and your Pardot hosted assets.

Answer: D

NEW QUESTION: 4

You are designing an 802.11 wireless network to include a controller as a central configuration point and access points across several remote sites. Which two aspects will manage the flow of the traffic to meet these design considerations?

(Choose two.)

- A.** WLAN access lists can be applied only to centrally switched WLANs.
- B.** The access point can receive multicast traffic in the form of multicast packets from the WLC.
- C.** Layer 3 roaming is not supported for locally switched WLANs.
- D.** WLAN local switching with VLAN mapping requires that VLAN ID that is mapped on the AP to match a dynamic interface that is configured on the wireless LAN controller.
- E.** The 802.1x authentication for a client associated to an AP on a locally switched WLAN is always handled at the wireless LAN controller side.

Answer: A,C
