NEW QUESTION: 1

Which of the following would Batchelder most likely use as a hash total?

- A. 0
- B. FG HK80
- C. 1
- D. 2

Answer: C

Explanation:

Input controls in batch computer systems are used to determine that no data are lost or added to the batch. Depending on the sophistication of a particular system. control may be accomplished by using record counts, batch totals, or hash totals. The hash total is a control total without a defined meaning, such as the total of employee numbers or invoice numbers, that is used to verify the completeness of data. The

hash total of the invoice numbers is 810. Batch elder Company has the following invoices in a batch:

NEW QUESTION: 2

A security analyst is reviewing vulnerability scan results and notices new workstations are being flagged as having outdated antivirus signatures. The analyst observes the following plugin output:

Antivirus is installed on the remote host:

Installation path: C:\Program Files\AVProduct\Win32\

Product Engine: 14.12.101

Engine Version: 3.5.71

Scanner does not currently have information about AVProduct version 3.5.71. It may no longer be supported.

The engine version is out of date. The oldest supported version from the vendor is 4.2.11.

The analyst uses the vendor's website to confirm the oldest supported version is correct.

Which of the following BEST describes the situation?

- A. This is a false negative, and the new computers need to be updated by the desktop team.
- B. This is a true negative, and the new computers have the correct version of the software.
- C. This is a true positive, and the new computers were imaged with an old version of the software.
- D. This is a false positive, and the scanning plugin needs to be updated by the vendor.

Answer: A

NEW QUESTION: 3
