NEW QUESTION: 4

Which IBM Tivoli Storage Manager server database backup type

can be taken offsite?

- A. differential database backups
- B. high availability database backups
- C. image database backups
- D. database snapshot backups

Answer: D

Explanation:

Snapshot database backups are typically used for off-site disaster recovery purposes.

Note:When the client backups are complete, the new data in the primary storage pools should be copied to a copy storage pool. The copy storage pool tapes, along with the database backup tapes, should be taken to a secure off-site location or vault. The copy storage pool and database backup tapes are referred to collectively as the off-site backups, and will be used to restore your environment in the event of a catastrophic failure or disaster.
