Free demo for CISSP-KR exam dumps are available, we recommend you to have a try before buying, so that you can have a deeper understanding of what you are going to buy.

The Best ISC CISSP-KR Latest Exam Practice & Perfect Tinova-Japan - Leading Offer in Qualification Exams

Q4: What does a PDF/Testing Engine Test File consist of, Just practice with our CISSP-KR exam guide on a regular basis and desirable outcomes will be as easy as a piece of cake.

If you choose our CISSP-KR pdf test training to be your leaning partner in the course of preparing for the exam, I can assure that you will pass the exam as well as get your desired certification as easy as pie.

They are quite surprised by the great progress they have made in such a short period, When you use CISSP-KR test guide, you can also get our services at any time.

I know that when you choose which our CISSP-KR exam materials to buy, it will be very tangled up, Time-saving is just a piece of cake for our products, With the arrival of experience [CISSP-KR](#) economy and consumption, the experience marketing is well received in the market.

In addition, in order to build up your confidence for CISSP-KR exam materials, we are pass guarantee and money back guarantee, and if you fail to pass the exam, we will give you full refund.

Users can learn the latest and latest test information through our CISSP-KR test dumps, Our CISSP-KR study materials boost the self-learning and self-evaluation functions so as to let the clients **CISSP-KR Latest Exam Practice** understand their learning results and learning process , then find the weak links to improve them.

CISSP-KR : Certified Information Systems Security Professional (CISSP Korean Version) valid questions provide PDF, APP and SOFT versions for you, Most of such free courses have substandard and inaccurate information that do not work to get

through exam.

And you will pass the exam easily, So you can fully trust us.

NEW QUESTION: 1

SIMULATION

Task: Configure the firewall (fill out the table) to allow these four rules:

Only allow the Accounting computer to have HTTPS access to theAdministrative

server.

Only allow the HR computer to be able to communicate with the Server2 System

over SCP.

Allow the IT computer to have access to both the AdministrativeServer 1 and

Administrative Server 2

Answer:

Explanation:

See the solution below.

Explanation/Reference:

Explanation:

Use the following answer for this simulation task.

Below table has all the answers required for this question.

Firewall rules act like ACLs, and they are used to dictate what traffic can pass between the firewall and the internal network. Three possible actions can be taken based on the rule's criteria:

Block the connection Allow the connection

Allow the connection only if it is secured

TCP is responsible for providing a reliable, one-to-one, connection-oriented session. TCP establishes a connection and ensures that the other end receives any packets sent.

Two hosts communicate packet results with each other. TCP also ensures that packets are decoded and sequenced properly. This connection is persistent during the session.

When the session ends, the connection is torn down.

UDP provides an unreliable connectionless communication method between hosts. UDP is considered a best-effort protocol, but it's considerably faster than TCP.

The sessions don't establish a synchronized session like the kind used in TCP, and UDP doesn't guarantee error-free communications.

The primary purpose of UDP is to send small packets of information.

The application is responsible for acknowledging the correct reception of the data. Port 22 is used by both SSH and SCP with

UDP.

Port 443 is used for secure web connections? HTTPS and is a TCP port.

Thus to make sure only the Accounting computer has HTTPS access to the Administrative server you should use TCP port 443 and set the rule to allow communication between 10.4.255.10/24 (Accounting) and 10.4.255.101 (Administrative server1) Thus to make sure that only the HR computer has access to Server2 over SCP you need use of TCP port 22 and set the rule to allow communication between

10.4.255.10/23 (HR) and 10.4.255.2 (server2)

Thus to make sure that the IT computer can access both the Administrative servers you need to use a port and accompanying port number and set the rule to allow communication between:

10.4.255.10.25 (IT computer) and 10.4.255.101 (Administrative server1)

10.4.255.10.25 (IT computer) and 10.4.255.102 (Administrative server2)

NEW QUESTION: 2

On March 1, First National Bank opened three accounts: 1) a savings account for Margaret Nelson, who did not have a TIN but signed a certification that she had applied for one; 2) a money market savings account for Linda Miller, who could not remember her TIN but promised to provide it at the earliest possible date; and 3) a certificate of deposit for John Whiteside, who completed a Form W-9 but provided a TIN with only eight numbers. Ms. Nelson provided her newly acquired TIN to the bank on April 15, Ms. Miller provided her TIN on April 5, and Mr. Whiteside provided his TIN to the bank on March 10. Interest was paid on all of these accounts on March 31, and the bank withheld 28 percent of the interest payments. On April 20 all the payees requested that the withheld interest be refunded. What should the bank do?

- A.** Refund only to Ms. Nelson because the interest was erroneously withheld
- B.** Refund to Ms. Nelson and Mr. Whiteside because the interest was erroneously withheld
- C.** Refund the withheld interest to all payees
- D.** Refund only to Mr. Whiteside because the interest was erroneously withheld

Answer: B

NEW QUESTION: 3

Which of the following authentication services should be replaced with a more secure alternative?

- A.** TACACS
- B.** TACACS+

- C. XTACACS
- D. RADIUS

Answer: A

Explanation:

Section: Access Control and Identity Management

Explanation/Reference:

Explanation:

Terminal Access Controller Access-Control System (TACACS) is less secure than XTACACS, which is a proprietary extension of TACACS, and less secure than TACACS+, which replaced TACACS and XTACACS.

NEW QUESTION: 4

Which of the following statements are false about Weighted Round Robin (WRR)? (Multiple Choice)

- A. WRR ensures important traffic being forwarded first.
- B. WRR cannot be used on gigabit-ethernet interfaces.
- C. WRR is a congestion management technology.
- D. WRR ensures that all queues being serviced.
- E. WRR prevents congestion on the network.

Answer: A,E
