Answer: D
Explanation:
Cold site
Space and associated infrastructure (e.g., power, telecoms and environmental controls to support IT systems), which will only be installed when disaster recovery (DR) services are activated.
Warm site
Site that's partially equipped with some of the equipment (e.g., computing hardware and software, and supporting personnel); organizations install additional equipment, computing hardware and software, and supporting personnel when DR services are activated.
Hot site
Fully equipped site with the required equipment, computing hardware/software and supporting personnel; it's also fully functional and manned on a 24x7 basis so that it's ready for organizations to operate their IT systems when DR services are activated.

Answer:
Explanation:

Explanation

Box 1: every five minutes at a random location
Test frequency: Sets how often the test is run from each test
location. With a default frequency of five minutes and five
test locations, your site is tested on average every minute.
Box 2:
Parse dependent requests: Test requests images, scripts, style
files, and other files that are part of the web page under
test. The recorded response time includes the time taken to get
these files. The test fails if any of these resources cannot be
successfully downloaded within the timeout for the whole test.
