He knew that such a candidate was a positive choice.

NEW QUESTION: 1

All the following are conditions that must be met if an otherwise nonqualified terminable interest is to qualify (as QTIP) for the federal estate tax marital deduction EXCEPT:

- A.** No person can be given the right to direct that the property go to anyone other than the surviving spouse as long as the surviving spouse is alive.
- B.** The surviving spouse must make a qualified disclaimer to all

other property in the deceased spouse's estate within 9 months of death.

C. The deceased spouse's executor must make an irrevocable election to have the property includible in the surviving spouse's gross estate.

D. The surviving spouse must be given a lifetime right to receive all the property's income at least annually.

Answer: B

NEW QUESTION: 2

If more than one Avaya Breeze(TM) mode is available in the cluster, which statement about redundancy and load balancing is true?

A. IM clients point to the Leader Avaya Breeze(TM) node SM100 IP address which redirects the clients to a particular Avaya Breeze(TM) node based on load balancing policy.

B. IM clients point to any Avaya Breeze(TM) node SM100 IP address. The client is dynamically informed of alternate Avaya Breeze(TM) nodes in the cluster.

C. The Cluster IP address is not used for Presence Services in 7.0. IM clients configure a FQDN instead of IP address which is resolved by a DNS server to all Avaya Breeze(TM) nodes in the cluster.

D. The list of all Avaya Breeze(TM) nodes SM100 IP addresses must be configured in the client.

Answer: A

Explanation:

Enable load balancing for a cluster if you want to scale the HTIP services without targeting a particular Avaya Breeze(TM) server. All the requests are sent to the cluster IP address. When you enable load balancing, two Avaya Breeze(TM) servers are chosen as the active and standby load balancing servers. The active load balancer distributes the HTIP requests to all the other servers in the cluster in a round robin fashion.
