NEW QUESTION: 2
A security technician has been asked to recommend an
authentication mechanism that will allow users to authenticate
using a password that will only be valid for a predefined time
interval. Which of the following should the security technician
recommend?
A. HOTP
B. CHAP
C. PAP
D. TOTP
Answer: D
Explanation:
Time-based one-time password (TOTP) tokens are devices or
applications that generate passwords at fixed time intervals.
Therefore, the password will only be valid for a predefined
time interval.

Answer:

Explanation:

Explanation

Box 1: Yes
Most services go to private preview then public preview before
being released to general availability.
The private preview is only available to certain Azure
customers for evaluation purposes. The public preview is
available to all Azure customers.
Box 2: No
Azure services in public preview can be managed using the
regular management tools: Azure Portal, Azure CLI and
PowerShell.
Box 3: No
Services in private or public preview are usually offered at
reduced costs. However, the costs increase, not decrease when
the services are released to general availability.
