NEW QUESTION: 2
Chatterã•¯ãƒ¢ãƒ•ã,¤ãƒ«ãƒ¦ãƒ¼ã,¶ãƒ¼ã•«ã•¯å^©ç″¨ã•§ã••ã•¾ã•>ã,"ã•‹ï¼Ÿ
A. æœ¬å½"
B. å•½
Answer: B
Explanation:
You can enable Salesforce Chatter for Salesforce Mobile users by including the News Feed object in your mobile configurations' data sets.

NEW QUESTION: 3
Which statement about Cisco FabricPath is true?
A. It is the best solution for interconnecting multiple data centers.
B. It is a simplified extension of Layer 3 networks across a single data center.
C. The Cisco FabricPath domain appears as a single STP bridge, where each edge port uses the same MAC address.
D. It optimizes STP throughout the Layer 2 network.
Answer: C
Explanation:
To have a loop-free topology for the CE/FabricPath hybrid network, the FabricPath network automatically displays as a single bridge to all connected CE devices. The STP domains do not cross into the FabricPath network. If multiple STP domains are defined, BPDUs and topology change notifications (TCNs) are localized to the domain. If a connected STP domain is multihomed to the FabricPath domain, a TCN must be able to reach to all devices in the STP domain through the FabricPath domain. As a result, the TCN is sent to the FabricPath domain through the IS-IS protocol data unit (PDU) by default.

Answer: B
Explanation:
Explanation
The Weighted Routing policy of Route53 can be used to direct a proportion of traffic to your application. The best option is to create a second CLB, attach the new Autoscaling Group and then use Route53 to divert the traffic.
Option B is wrong because just having EC2 instances running with the new code will not help.
Option C is wrong because Clastic beanstalk is good for development environments, and also there is no mention of having 2 environments where environment url's can be swapped.
Option D is wrong because you still need Route53 to split the traffic.
For more information on Route53 routing policies, please refer to the below link:
* http://docs.aws.a
mazon.com/Route53/latest/DeveloperGuide/routing-policy. html
