C_TSCM62_67 simulating exam will inspire your potential, Products can be downloaded very easily from the Member's Area after logging in.

NEW QUESTION: 1

You typically get which of the following when you use a lens or reflector on a PMP subscriber module?

- A. horizontal polarization of beam
- B. increased beam width
- C. reduced beam width
- D. vertical polarization of beam

Answer: C

NEW QUESTION: 2

At the completion of a system development project, a postproject review should include which of the following?

- A. Identifying lessons learned that may be applicable to future projects
- B. Ensuring that test data are deleted
- C. Verifying the controls in the delivered system are working
- D. Assessing risks that may lead to downtime after the production release

Answer: A

Explanation:

Explanation/Reference:

Explanation:

A project team has something to learn from each and every project. As risk assessment is a key issue for project management, it is important for the organization to accumulate lessons learned and integrate them into future projects. An assessment of potential downtime should be made with the operations group and other specialists before implementing a system. Verifying that controls are working should be covered during the acceptance test phase and possibly, again, in the postimplementation review. Test data should be retained for future regression testing.

NEW QUESTION: 3

You are developing an application that accepts the input of dates from the user.

Users enter the date in their local format. The date entered by the user is stored in a string variable named `inputDate`. The valid date value must be placed in a `DateTime` variable named `validatedDate`.

You need to validate the entered date and convert it to Coordinated Universal Time (UTC). The code must not cause an exception to be thrown.

Which code segment should you use?

- A. Option C
- B. Option A
- C. Option B
- D. Option D

Answer: B

Explanation:

Explanation/Reference:

Explanation:

AdjustToUniversal parses s and, if necessary, converts it to UTC.

Note: The DateTime.TryParse method converts the specified string representation of a date and time to its DateTime equivalent using the specified culture-specific format information and formatting style, and returns a value that indicates whether the conversion succeeded.

NEW QUESTION: 4

An administrator is asked to change a configuration using a GUI on a Windows server, but does not have access to a KVM. Which of the following is BEST to make the change?

A. SCP

B. RDP

C. NTP

D. SSH

Answer: B
