Our answers and questions are compiled elaborately and easy to be mastered, As an electronic product, our C1000-149 free pdf dumps have the character of fast delivery.

We warmly welcome all your questions, So choosing our C1000-149 study materials make you worry-free, We can be proud to say that we are the best exam collection provider in this area.

So our C1000-149 simulating exam is definitely making your review more durable, both in practical and theoretical terms, Dear customers, welcome to browse our products.

NEW QUESTION: 1
You are developing a full Microsoft .NET Framework solution that includes unit tests.
You need to configure SonarQube to perform a code quality validation of the C# code as part of the build pipelines.
Which four tasks should you perform in sequence? To answer, move the appropriate tasks from the list of tasks to the answer area and arrange them in the correct order.

Answer:
Explanation:

Explanation

Step 1: Prepare Analysis Configuration

Prepare Analysis Configuration task, to configure all the
required settings before executing the build.
This task is mandatory.
In case of .NET solutions or Java projects, it helps to
integrate seamlessly with MSBuild, Maven and Gradle tasks.
Step 2: Visual Studio Build
Reorder the tasks to respect the following order:
Prepare Analysis Configuration task before any MSBuild or
Visual Studio Build task.
Step 3: Visual Studio Test
Reorder the tasks to respect the following order:
Run Code Analysis task after the Visual Studio Test task.
Step 4: Run Code Analysis
Run Code Analysis task, to actually execute the analysis of the
source code.
This task is not required for Maven or Gradle projects, because
scanner will be run as part of the Maven/Gradle build.
