Answer: D

NEW QUESTION: 2

During 1990, Fuqua Steel Co. had the following unusual financial events occur:

. Bonds payable were retired five years before their scheduled maturity, resulting in a \$260,000 gain.

Fuqua has frequently retired bonds early when interest rates declined significantly.

. A steel forming segment suffered \$255,000 in losses due to hurricane damage. This was the fourth similar loss sustained in a 5-year period at that location.

. A component of Fuqua's operations, steel transportation, was sold at a net loss of \$350,000.

This was Fuqua's first divestiture of one of its operating segments.

Before income taxes, what amount should be disclosed as the gain (loss) from extraordinary items in

1 990?

A. \$5,000

B. \$0

C. \$(90,000)

D. \$(350,000)

Answer: B

Explanation:

Choice "a" is correct. \$0. Note: The sale of the steel transportation component resulted in a loss from discontinued operations and is reported after "income from continuing operations." The steel forming segment's hurricane damage (4th in 5 years) of \$255,000 is only "unusual in nature" and does not occur infrequently, therefore, it is not an "extraordinary item," and should be reported separately as a component of "income from continuing operations." The retirement of debt, although unusual, is not infrequent for the company; therefore, the gain does not qualify for classification as an extraordinary item per APBO No. 30 (and SFAS No. 145).

NEW QUESTION: 3

You have been asked to investigate a potential security risk on your company's Oracle Cloud Infrastructure (OCI) tenancy. You decide to start by looking through the audit logs for suspicious activity.

How can you retrieve the audit logs using the OCI Command Line Interface (CLI)?

A. oci audit event list --end-time \$end-time --compartment-id \$compartment-id

- B. `oci audit event list --start-time $start-time --end-time $end-time --tenancy-id $tenancy-id`
- C. `oci audit event list --start-time $start-time --end-time $end-time --compartment-id $compartment-id`
- D. `oci audit event list --start-time $start-time --compartment-id $compartment-id`

Answer: C

Explanation:

Explanation

Retrieving Audit events

In order to make use of audit events, the first step is to retrieve and store audit events. Let's take a look into the ways in which an Audit event can be retrieved:

Oracle Cloud Infrastructure Web Console - With user credentials, customers can log in to the web console to access the Audit service. For example, when customers are trying the service for the first time; this helps with a first look into a handful of events.

Oracle Cloud Infrastructure CLI [3] - With CLI customers can make use of the service to retrieve events for a defined compartment and for a region specified as per CLI's config. The CLI command would look like:

```
#oci audit event list --start-time $start-time --end-time $end-time --compartment-id $compartment-id
```

Oracle Cloud Infrastructure SDKs [4][5] - With SDKs customers can choose a supported language and retrieve Audit events with the ListEvents API [6]. For production use cases, this would be the best suitable option.
