NEW QUESTION: 1
Overview
General Overview
Contoso, Ltd. is a manufacturing company that has 500 employees. The company has sales, marketing, research, and accounting departments.
Contoso recently acquired another company named A Datum Corporation, which has 100 users with mailboxes hosted on a third-party, non-Microsoft Exchange Server platform.
Physical Locations
Contoso has two offices. One office is located in New York and the other office is located in London.
The offices connect to each other by using a WAN link. Each office also connects directly to the Internet.
Existing Environment

Active Directory

The network contains an Active Directory forest named contoso.com. The forest contains a single domain.

All domain controllers run Windows Server 2008 R2.

Each office contains five domain controllers. Each office is configured as an Active Directory site.

Office 365 Subscription

Contoso recently purchased an Office 365 subscription and began using Exchange Online, SharePoint Online, and Skype for Business Online.

All Office 365 identities are managed in the cloud.

Current Business Model

Users in the accounting department have access to Windows by using Remote Desktop Services (RDS).

All client applications, including Office, are made available through Remote Desktop sessions.

Users in the marketing department frequently change their computer and must reinstall Office.

Users in the research department deal with highly sensitive patents; therefore, they do not have access to the Internet from their computer.

Problem Statements

Contoso identifies the following issues on the network:

Users who started using Skype for Business Online for instant messaging report that they receive

increased amounts of unsolicited commercial instant messages from a domain named fabrikam.com.

A new employee named User1 reports that this name was misspelled when his account was initially

created, which has resulted in an incorrect user sign-in SIP address in Skype for Business Online.

Mobile Device Mailbox Policies

You have the following mobile device mailbox policies in Office 365.

Requirements

Business goals

Contoso plans to upgrade to Office 2016 during the next six months.

As much as possible, Contoso plans to minimize the costs associated with purchasing hardware and software.

Planned Changes

Contoso plans to implement the following changes on the network:

The A Datum mailboxes will be migrated to the Exchange Online tenant of Contoso by using the IMAP

migration method.

The executive management at Contoso wants to prevent users from accessing their Exchange Online

mailbox by using Outlook on the web.
As a part of the A Datum acquisition, some managers in the New York office will receive a new primary

SMTP address. The current primary SMTP addresses of the managers must be demoted to secondary addresses.
The manager of a user named User2 in the accounting department requests a new email address of

 for the user. All new email messages sent by User2 must come from the new address. User2 must still be able to receive messages by using the current address of
Technical Requirements
Contoso identifies the following technical requirements:
The amount of time required to install Office on the marketing department computers must be

minimized.
The computers of the users in the sales department must have only the 64-bit version of Office 365

ProPlus installed.
All Exchange Online mailbox data must be retained for 18 months (540 days) and then moved to a

user's archive mailbox.
The legal department requests that only items in the mailbox of a user named User5 that were sent or

received between July and November of last year be preserved for 540 days.
The legal department requests that all mailbox items in the organization that have the keyword ProjectX

be placed on hold for 180 days from the time they were received or created.
If an In-Place Hold is configured for a user, the For compliance, turn off non-archived features Skype

for Business Online option must be enabled. Users must only be notified that these features will be disabled temporarily while the In-Place Hold is in effect.
Contoso plans to introduce a new mobile device mailbox policy by running the New-

MobileDeviceMailboxPolicy-Name "Unrestricted"-PasswordEnabled $true -
AlphanumericPasswordRequired $true -PasswordRecoveryEnabled $true -IsDefault $true- AttachmentsEnabled $true -AllowStorageCard $true command Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each

question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You need to recommend a solution to meet the technical requirement for mailbox data retention.
Solution: Create a personal tag and add the tag to a new retention policy. Assign the retention policy to the mailboxes.
Does this meet the goal?
A. No
B. Yes
Answer: A

NEW QUESTION: 2
Drag the description on the left to the most appropriate FCoE protocol or feature on the right.

Answer:
Explanation:

Explanation

ENODES: During FLOGI or FDISC, the ENode advertises the addressing modes it supports. If the FC switch supports an addressing mode that the ENode uses, the virtual link can be established, and the devices can communicate.
FIP: FIP is the set of control plane functions that enable discovery of FCoE-capable devices across FCoE passthrough switches and establishment of legal combinations of virtual links.
FCF: FCoE Initialization Protocol (FIP) is the FCoE control protocol responsible for establishing and maintaining Fibre Channel virtual links between pairs of FCoE devices (ENodes or FCFs). During the virtual link establishment phase, FIP first discovers FCoE VLANs and remote virtual FC interfaces; then it performs virtual link initialization functions (fabric login [FLOGI] and fabric discovery [FDISC], or exchange link parameters [ELP]) similar to their native Fibre Channel equivalents. After the virtual link is established, Fibre Channel payloads can be exchanged on the virtual link, and FIP remains in the background to perform virtual link maintenance functions; it continuously verifies reachability between the two virtual FC interfaces on the Ethernet network, and it offers primitives to delete the virtual link in response to administrative actions to that effect. This document does not describe the virtual link maintenance functions of FIP.

NEW QUESTION: 3

A. Option A
B. Option B
C. Option D
D. Option C
Answer: A

NEW QUESTION: 4
Tableau auto-generates _____ dimension(s) and
_____ measure(s) for us

A. 2 , 2
B. 1 , 4
C. 1 , 2
D. 2 , 3
Answer: B
Explanation:
Explanation
Tableau auto-generates :
1 Dimension - Measure Names
4 Measures - Latitude, Longitude, Number of records, Measure
Values
Starting with Tableau 2020.2, every table in a data source has
a Count field, in the form of NameofTable(Count). The table
count field is an automatically generated, calculated field.
(THIS IS NOT PRESENT IN VERSION 2020.1 ON WHICH THE EXAM IS
CURRENTLY BASED)
