NEW QUESTION: 1

Someone using Google Russian domain (Google.ru) changes the language to English on the "preferences" page. This user may see ads targeted to:

- A. English speakers in Russia
- B. Russian speakers in the Germany
- C. Russian speakers in the Czech Republic.
- D. English speakers in the United States.

Answer: A

NEW QUESTION: 2

With regard to the compensation of dental care providers in a managed dental care system, it is correct to state that, typically:

- A. dental PPOs compensate dentists on a capitated basis
- B. group model dental HMOs (DHMOs) compensate general dental practitioners on a salaried basis
- C. independent practice association (IPA)-model dental HMOs

(DHMOs) capitate general dental practitioners

D. staff model dental HMOs (DHMOs) compensate dentists on an FFS basis

Answer: C

NEW QUESTION: 3

A System Administrator has configured SSL Inspection in XGS, but end users get prompted to verify the certificate in the browser when viewing SSL web pages. To fix the issue the System Administrator must distribute the CA certificates so that it can be imported in the Trusted Root Certification Authorities in end users' browsers.

Which Menu option allows the System Administrator to download the CA Certificate?

A. Management Certificate Authorities

B. Inbound SSL Certificates

C. Appliance SSL Certificate

D. Outbound SSL Certificates

Answer: D

Explanation:

In order for Outbound SSL to work properly, the XGS Certificate Authority (CA) certificate must be installed in the browser in order for the browser to verify the identity of the XGS. If you do not add the CA certificate, Outbound SSL will not work properly, introduce latency, and could cause pages to fail to load.

If users get prompted to verify the certificate in the browser when viewing SSL web pages, this indicates that the CA is not loaded or is loaded in the incorrect place. The CA certificate must be loaded in the Trusted Root Certification Authorities tab in Certificates in Internet Explorer and the Authorities tab in the Certificates Manager in Firefox.

To download the CA certificate, log on to the LMI and go to Manage System Settings > Network Settings > Outbound SSL Certificates. Select the Active Device CA certificate and select Download.
