Why do customers give the priority to our C-HCMOD-01 practice vce among the multitudinous products?

NEW QUESTION: 1
Your company plans to use Office 365 and Microsoft SharePoint Online.
Another employee provisions the company's Office 365 tenant.

You discover that the employee can create and
manage SharePoint site collections.
You need to prevent the employee from creating or managing site
collections. From which role should you remove the
employee?
A. Site collection administrator
B. SharePoint Online administrator
C. Service administrator
D. Global administrator
Answer: D
Explanation:
The question states that "Another employee provisions the
company's Office 365 tenant". The person who provisions
an Office 365 tenant will automatically be assigned to the
Global administrator role. In Office 365, a Global
administrator is also a SharePoint Online administrator.
We could prevent the employee from creating or managing site
collections by removing the employee from the
SharePoint Online administrator role. However, as a Global
Administrator, the employee could add himself/herself
back to the SharePoint Online administrator role. Therefore, we
should remove the employee from the Global
Administrator role.

NEW QUESTION: 2
An outsourced call center is using SIP VoIP telephony that
imposes
restrictions on the use of NAT. the company expects the number
of call
center staff to grow from 100 to 200 people. Which two design
solutions ensure the most cost efficient and scalable way for
call center staff to access internal corporate applications?
(Choose two.)
A. Utilize NAT pool to translate IP addresses provided by the
call center.
B. Provide the call center with a /24 private IP subnet that is
unique on both sides.
C. Implement 1-to-1 NAT translation for each of the agent
workstations.
D. Request that the call center use public IP addresses for
agent workstations.
E. Configure a single IP address to create dynamic port
translations for agent workstations.
Answer: A,D
