Answer: C

Explanation:
Delegated permissions - Your client application needs to access
the web API as the signed-in user, but with access limited by
the selected permission. This type of permission can be granted
by a user unless the permission requires administrator consent.
Incorrect Answers:
A, D: Application permissions - Your client application needs
to access the web API directly as itself (no user context).
This type of permission requires administrator consent and is
also not available for public (desktop and mobile) client
applications.

Explanation
AWS EBS supports encryption of the volume while creating new
volumes. It also supports creating volumes from existing
snapshots provided the snapshots are created from encrypted
volumes. The data at rest, the I/O as well as all the snapshots
of EBS will be encrypted. The encryption occurs on the servers
that host the EC2 instances, providing encryption of data as it
moves between the EC2 instances and EBS storage. EBS encryption
is based on the AES-256 cryptographic algorithm, which is the
industry standard.
