Refund.

NEW QUESTION: 1
A technician is installing an upgrade of Windows on a machine using an external drive. After rebooting the installation process hangs and reports the media cannot be found. Which of the following will correct this issue?
A. Reset the system clock to a previous time and date
B. Load third party drivers for the external drive and adapter
C. Select PXE boot as the first boot method in the BIOS
D. Change the CPU speed in the BIOS to a supported value
Answer: B

NEW QUESTION: 2
When a Cisco IOS gatekeeper receives an ARQ from a registered endpoint, what is the first step it will take in an attempt to resolve the destination address?
A. Check to see if the destination address matches the local zone prefix.
B. Check to see if the destination address matches the default technology prefix.
C. Check to see if the destination address matches the remote zone prefix.
D. Check to see if the destination address is locally registered.
E. Check to see if the destination address matches the technology prefix.
Answer: E
Explanation:
Admission Request (ARQ) and Location Request (LRQ) are the two H.225 Registration, Admission, Status (RAS) messages that trigger a gatekeeper to initiate the call routing decision process.
ARQ--Local zone messages that are sent by
H.323 endpoints (usually gateways) to the Cisco gatekeeper. Gatekeepers receive ARQs from an endpoint if.

NEW QUESTION: 3
An architect is designing a solution for an environment with two types of resource profiles that must be virtualized. The first type consists of Tier 1 virtual machines that are disk I/O intensive, but do NOT require high CPU or memory. The second type consists of Tier 2 virtual machines that require a lower CPU and memory allocation and have minimal disk I/O. Which design recommendation should the architect make for distributing the resource profiles?
A. Run both resource profiles on the same cluster with the same host hardware platform.
B. Separate the two resource profiles into two clusters. The

Tier 1 cluster will have fast storage while the Tier 2 cluster
will not.
C. Separate the two resource profiles into two clusters. The
Tier 2 cluster will have faster CPU and more memory while the
Tier 1 cluster will have slower CPU and less memory but more
disk space.
D. Run both resource profiles on the same cluster with host
hardware that has fast CPU, large amounts of memory, and the
fastest storage platform.
Answer: D
