Northwind Traders

Overview

Northwind Traders is a retail company that has three offices. The offices are located in New York, Montreal, and Miami.

In the data center of the New York office, the company plans to implement a private cloud solution that will use System Center 2012 R2.

Existing Environment

Network Infrastructure

The network contains two Active Directory forests named northwindtraders.com and contoso.com.

The northwindtraders.com forest contains servers that run either Windows Server 2012 R2 or Windows Server 2012. The northwindtraders.com forest contains all of the computers in the New York office and the Montreal office.

The contoso.com forest contains all of the computers in the Miami office. A trust relationship does not exist between the forests.

Server Environment

The data center of the Montreal office contains three servers. The servers are configured as shown in the following table.

The data center of the New York office contains seven servers. The servers are configured as shown in the following table.

Service Pack 1 (SP1) for System Center 2012 is deployed to all of the System Center servers. All of the System Center servers run Windows Server 2012. Currently, VMM is used to deploy virtual machines to Hyper-V hosts.

Implementation Plans

Planned Upgrades

Northwind Traders plans to upgrade all physical servers to Windows Server 2012 R2 and all System Center 2012 components to System Center 2012 R2. Administrators also plan to add all of the System Center 2012 R2 components that are NOT deployed already.

Planned Development

Northwind Traders plans to deploy seven new servers to the New York data center. The servers will be configured as shown in the following table.

All of the SQL Server servers will use the default instances. Northwind Traders plans to move all of the virtual machines on the Hyper-V hosts to four new private clouds named IT, Sales, Finance, and Corporate. The Hyper-V hosts in

the IT private cloud will have their network adapters configured by using logical switches. After the planned implementation of System Center 2012 R2, the administrators plan to deploy the Service Manager Self-Service Portal.

The administrators also plan to integrate System Center and Windows Azure.

The company's developers recently developed an order management application that contains a web application and a Windows service. The Windows service accesses a database. You use Server Application Virtualization (Server App-V) packages to deploy the web application and the Windows service. You use a SQL Server dedicated administrator connection (DAC) package to deploy the database.

Requirements

General Requirements

Northwind Traders plans to:

Reuse existing servers whenever possible.

*

Minimize the development of custom code.

*

Minimize the numbers of components for any solution.

*

Minimize the amount of permissions assigned to users.

*

Minimize the amount of administrative effort whenever possible.

*

System Center Requirements

Northwind Traders must meet the following requirements:

VMM must be able to use the storage on ST01 and ST02.

*

Users must be able to access the Service Manager Self-Service Portal.

*

The servers in the Miami office must be monitored by using Operations Manager.

*

The order management application must be deployed by using a service template.

*

Users of the Corporate private cloud must be able to copy their virtual machines to Windows

*

Azure.

The Service Manager Self-Service Portal and the SharePoint Server 2010 infrastructure must

*

be integrated.

The NIC teaming mode for network adapters must be the same on all of the Hyper-V hosts

*

in the IT private cloud.

The operational database and the data warehouse database used by Operations Manager must

*

be on separate servers.

Each virtual machine created in the Sales private cloud must be limited to four virtual CPUs

*

and eight GB of memory.

The data collected from all of the monitored servers must reside in the same database in the

*

northwindtraders.com forest.
