PDF version is a normal file, Now, many people choose to get 1V0-91.22PSE certification, which means they are experiencing a difficult process for the preparation of the 1V0-91.22PSE actual test.

If you want to know more details please email us, We whittle down **Reliable 1V0-91.22PSE Exam Papers** the complicated content and can totally quicken your pace of review and foreshadow your success if you place your order now.

You may wonder how we can assure of the accuracy of 1V0-91.22PSE vce files, Then you are fortunate enough to come across our 1V0-91.22PSE quiz guide, This quality VMware 1V0-91.22PSE braindumps PDF polishes your skills and widens your horizons intellectually to ace challenges of a complex IT certification like VMware VMware Certification.

#### **NEW QUESTION: 1**

You are developing a SQL Server Reporting Services (SSRS) sales summary report.

The report header consists of several images. Report users require PDF exports of the report with no bulky images of the report header.

You need to ensure that the header of the report is hidden when a user exports the report to PDF format.

What should you do? (More than one answer choice may achieve

the goal. Select the BEST answer.)

- A. Set the Hidden property of the report header to FALSE.
- B. Set the Hidden property of the report header to (Globals!RenderFormat.Name = "PDF").
- C. Set the Hidden property of the report header to (Globals!RenderFormat.IsInteractive = False).
- D. Set the Hidden property of the report header to TRUE.

**Answer: B**

#### **NEW QUESTION: 2**

You administer a Microsoft SQL Server 2016 default instance. The instance is hosted by a server that has a local firewall configured.

The firewall only allows inbound connections on port 1433. The server only hosts a single instance of SQL Server.

You need to ensure that the instance is configured to allow remote connections even if the SQL Server is unresponsive to client connections.

What should you do?

- A. Execute the Reconfigure command.
- B. Execute the following Transact-SQL command: `sp_configure 'remote admin connections',`
- C. Restart the SQL Server Agent Service.
- D. Enable inbound connections on TCP port 135 in the Windows Firewall on the server.
- E. Enable inbound connections on TCP port 1434 in the Windows Firewall on the server.
- F. Execute the following Transact-SQL command: `sp_configure 'remote access', 1`

**Answer: A,B,E**

Explanation:

Explanation/Reference:

SQL Server provides a dedicated administrator connection (DAC). The DAC lets an administrator access a running server to execute diagnostic functions or Transact-SQL statements, or to troubleshoot problems on the server, even when the server is locked or running in an abnormal state and not responding to a SQL Server Database Engine connection. By default, the DAC is only available from a client on the server. To enable client applications on remote computers to use the DAC, use the remote admin connections option of `sp_configure`.

By default, the DAC only listens on the loop-back IP address (127.0.0.1), port 1434. The following example enables the DAC from a remote computer.

```
sp_configure 'remote admin connections', 1;
```

```
GO
```

```
RECONFIGURE;
```

```
GO
```

**NEW QUESTION: 3**

HP Support asked you to load diagnostics from a SmartStart CD to evaluate a DL360 G6 server. The customer removed the DVD drive and installed the optional disk backplane to add more disk drives. With no DVD drive available, how can you load the diagnostics?

- A. Make a bootable USB key drive with the SmartStart ISO on it.
- B. Make multiple floppy disks from a the SmartStart image for floppies.
- C. Remove the additional disks and replace the DVD drive until service is completed.
- D. Nothing can be done without a CD/DVD drive installed on the server.

**Answer: A**

Explanation:

No floppy support, done it myself using usb, A is too much work and you can't be sure all components are updated.

**NEW QUESTION: 4****Answer:**
