**Answer:**

Explanation:

Explanation

Step 1: Create a NuGet package. NuGet and Maven are public package managers that support multiple feeds. Step 2: Create an Azure Artifacts feed that uses upstream sources If you want to use packages from multiple feeds, use upstream sources to bring packages from multiple feeds together into a single feed. Step 3: Create a Microsoft Visual Studio project that includes all the packages Consume NuGet packages from upstream sources: Now you can open Visual Studio and install packages from the upstream sources you just configured.
