You are evaluating the name resolution for the virtual machines after the planned implementation of the Azure networking infrastructure.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

**Answer:**

Explanation:

Explanation

Scenario: You plan to create a private DNS zone named humongousinsurance.local and set the registration network to the ClientResources-VNet virtual network.

There is a virtual network named ClientResources-VNet that will contain one subnet named ClientSubnet Note: Azure DNS provides the following capabilities:

- \* Automatic registration of virtual machines from a single virtual network that's linked to a private zone as a registration virtual network.

- \* Forward DNS resolution is supported across virtual networks that are linked to the private zone as resolution virtual networks.

- \* Reverse DNS lookup is supported within the virtual-network scope.
