**D.** AWSã,·ãƒ¼ãƒ«ãƒ‰ã•§DDoSä¿•è-·ã,'æ••ä¾>ã•—ã•¾ã•™ã€‚
**Answer: C**
Explanation:
AWS Security Groups act like a firewall for your Amazon EC2 instances controlling both inbound and outbound traffic. When you launch an instance on Amazon EC2, you need to assign it to a particular security group.
After that, you can set up ports and protocols, which remain

open for users and computers over the internet.
AWS Security Groups are very flexible. You can use the default
security group and still customize it according to your liking
(although we don't recommend this practice because groups
should be named according to their purpose.) Or you can create
a security group that you want for your specific applications.
To do this, you can write the corresponding code or use the
Amazon EC2 console to make the process easier.

**Answer: C**
Explanation:
https://aws.amazon.com/blogs/database/how-to-configure-a-privat
e-network-environment-for- amazon-dynamodb-using-vpc-endpoints/
So, it's possible to create a more secure environment using
private routing, and CDIR based security group references can
be created:
https://docs.aws.amazon.com/vpc/latest/peering/vpc-peering-secu
rity-groups.html

**NEW QUESTION: 3**

A technician is changing out a toner cartridge in a high volume printer. As they are removing the empty cyan cartridge, a large amount of blue powder falls out onto rollers in the immediate area. Which of the following should the technician do NEXT?

**A.** Use a toner vacuum to remove the spilled toner from the undesired surfaces.

**B.** Immediately leave the scene and sound an emergency to security.

**C.** Use the maintenance kit to remove and replace the affected parts.

**D.** Use compressed air to remove the spilled toner from the undesired surfaces.

**Answer: A**

Explanation:
