Training Centers, Here our products strive for providing you a comfortable study platform and continuously upgrade 156-315.81 test questions to meet every customer's requirements.

NEW QUESTION: 1
Which of the following document is owned by executive management and sets the purpose of BCM in an organisation?
A. Business Process Policy
B. Worksheet
C. Register
D. Business Continuity Policy
Answer: D

NEW QUESTION: 2
Which DNS lookup does an access point perform when attempting CAPWAP discovery?

A. CISCO-DNA-CONTROLLER.local
B. CAPWAP-CONTROLLER.local
C. CISCO-CAPWAP-CONTROLLER.local
D. CISCO-CONTROLLER.local
Answer: C
Explanation:
The Lightweight AP (LAP) can discover controllers through your domain name server (DNS). For the access point (AP) todo so, you must configure your DNS to return controller IP addresses in response to CISCO-LWAPP-CONTROLLER.localdomain, where localdomain is the AP domain name. When an AP receives an IP address and DNSinformation from a DHCP server, it contacts the DNS to resolve CISCO-CAPWAP-CONTROLLER.localdomain. When theDNS sends a list of controller IP addresses, the AP sends discovery requests to the controllers.
The AP will attempt to resolve the DNS name CISCO-CAPWAP-CONTROLLER.localdomain. When the AP is able toresolve this name to one or more IP addresses, the AP sends a unicast CAPWAP Discovery Message to the resolved IPaddress(es).
Each WLC that receives the CAPWAP Discovery Request Message replies with a unicast CAPWAP DiscoveryResponse to the AP.

NEW QUESTION: 3
A Solutions Architect is working on a PCI-compliant architecture that needs to call an external service provider's API. The external provider requires IP whitelisting to verify the calling party.
How should the Solutions Architect provide the external party with the IP addresses for whitelisting?
A. Deploy the Lambda function in private subnets and route outbound traffic through a NAT gateway.
Provide the NAT gateway's Elastic IP address to the external service provider.
B. Use an API Gateway in proxy mode, and provide the API Gateway's IP address to the external service provider.
C. Associate a public elastic network interface to a published stage/endpoint in API Gateway, exposing the AWS Lambda function, and provide the IP address for the public network interface to the external party to whitelist.
D. Provide the external party the allocated AWS IP address range for Lambda functions, and send change notifications by using a subscription to the AmazonIpSpaceChanged SNS topic.
Answer: A
Explanation:
There is no such a thing of "API Gateway's IP address".
