NEW QUESTION: 2

You create Web sites for your company. You apply a consistent design to the pages and controls of the Web sites.

You need to make style changes to all of the Web sites on the Web server. You want to achieve this goal without having to edit the individual pages on each Web site.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Place a theme under an ASP.NETClientFiles folder under the ASP.NET installation directory.
- B. Assign a theme by setting the <%@ Page Theme="..." %> directive to the name of the application theme.
- C. Assign a theme by specifying the <pages theme="..."/> section in the Web.config file.
- D. Place a theme in the App_Themes directory under the application root directory.

Answer: A,C

NEW QUESTION: 3

A company is using Amazon API Gateway to manage its public-facing API. The CISO requires that the APIs be used by test account users only. What is the MOST secure way to restrict API access to users of this particular AWS account?

- A. Usage plans
- B. API Gateway resource policies
- C. Cross-origin resource sharing (CORS)
- D. Client-side SSL certificates for authentication

Answer: B
