NEW QUESTION: 1

A database administrator comes across the below records in one of the databases during an internal audit of the payment system:

```
UserIDAddressCredit Card No.Password  
jsmith123 fake street55XX-XXX-XXXX-1397Password100  
jqdoe234 fake street42XX-XXX-XXXX-202717DEC12
```

From a security perspective, which of the following should be the administrator's GREATEST concern, and what will correct the concern?

A. Concern: User IDs are confidential private information.

Correction: Require encryption of user IDs.

B. Concern: Passwords are stored in plain text.

Correction: Require a minimum of 8 alphanumeric characters and hash the password.

C. Concern: User IDs are also usernames, and could be enumerated, thereby disclosing sensitive account information.

Correction: Require user IDs to be more complex by using alphanumeric characters and hash the UserIDs.

D. Concern: More than four digits within a credit card number are stored.

Correction: Only store the last four digits of a credit card to protect sensitive financial information.

Answer: B

NEW QUESTION: 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription that contains several Microsoft SharePoint Online sites.

You need to ensure that the content stored in a SharePoint modern team site named Sales is available from Microsoft Teams. The solution must ensure that when a new channel is added to a team, a folder for the channel is created in the Sales site.

Solution: From the Sales site, you use the Create a Team option.

Does this meet the goal?

A. No

B. Yes

Answer: A

Explanation:
