NEW QUESTION: 2

Which option describes the effect of the OSPF default-information originate always command?

- A.** It adds a static default route to the device configuration.
- B.** It configures the device to advertise a default route regardless of whether it exists in the routing table.
- C.** It configures the device to automatically redistribute a default route.
- D.** It creates a stub area.

Answer: B

Explanation:

default-information originate

To generate a default external route into an Open Shortest Path First (OSPF) routing domain, use

the default-information originate command in router configuration mode. To disable this feature, use the no form of this command.

```
default-information originate [always] metric metric-value [
metric-type type-value ] [ route-
map map-name ]
```

Syntax Description

always (Optional) Always advertises the default route regardless of whether the software has a default route.
