NEW QUESTION: 3

A company manufactures high-end speaker systems. You have different configurations available for customers to customize features including finishes and speaker materials. You have a product configuration model with bill of material lines and conditions for each component.

A customer can optionally add on protective covers, but only if a non-metal material is selected. If any other material is selected, the covers cannot be added. You add the following attributes:

You need to create an expression-based constraint that will only allow Corner Protection if Metal is not selected.

How should you complete the expression? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 4

Your database has the SRV1 service configured for an

application that runs on middle-tier application server. The application has multiple modules. You enable tracing at the service

level by executing the following command:

```
SQL > exec DBMS_MONITOR.SERV_MOD_ACT_TRACE_ENABLE ('SRV1');
```

The possible outcome and actions to aggregate the trace files are as follows:

1. The command fails because a module name is not specified.
 2. A trace file is created for each session that is running the SRV1 service.
 3. An aggregated trace file is created for all the sessions that are running the SRV1 service.
 4. The trace files may be aggregated by using the trcess utility.
 5. The trace files be aggregated by using the tkprof utility.
- Identify the correct outcome and the step to aggregate by using tkprof utility?

- A. 0
- B. 3 and 5
- C. 2 and 4
- D. 3 and 4
- E. 2 and 5

Answer: C

Explanation:

Tracing information is present in multiple trace files and you must use the trcess tool to collect it into a single file.

Incorrect:

Not 1: Parameterservice_name

Name of the service for which tracing is enabled.

module_name

Name of the MODULE. An optional additional qualifier for the service.

Note:

* The procedure enables a trace for a given combination of Service, MODULE and ACTION name. The specification is strictly hierarchical: Service Name or Service Name/MODULE, or Service Name, MODULE, and ACTION name must be specified. Omitting a qualifier behaves like a wild-card, so that not specifying an ACTION means all ACTIONs. Using the ALL_ACTIONS constant achieves the same purpose.

*SERV_MOD_ACT_TRACE_ENABLE Procedure

This procedure will enable SQL tracing for a given combination of Service Name, MODULE and ACTION globally unless an instance_name is specified.

```
*DBMS_MONITOR.SERV_MOD_ACT_TRACE_ENABLE(  
service_name IN VARCHAR2,  
module_name IN VARCHAR2 DEFAULT ANY_MODULE,  
action_name IN VARCHAR2 DEFAULT ANY_ACTION,  
waits IN BOOLEAN DEFAULT TRUE,  
binds IN BOOLEAN DEFAULT FALSE,  
instance_name IN VARCHAR2 DEFAULT NULL);
```
