NEW QUESTION: 1

A network administrator is looking to implement a solution allowing users to utilize a common password to access most network resources for an organization. Which of the following would BEST provide this functionality?

- A. Two-factor authentication
- B. RADIUS
- C. Single sign on
- D. Multifactor authentication

Answer: C

Explanation:

Single sign-on (SSO) is a session/user authentication process that permits a user to enter one name and password in order to access multiple applications. The process authenticates the user for all the applications they have been given rights to and eliminates further prompts when they switch applications during a particular session.
