H12-831_V1.0-ENU Exam Dumps & H12-831_V1.0-ENU Dumps Guide & H12-831_V1.0-ENU Best Questions

Our customer service personnel are working on the whole day and **Valid H12-831_V1.0-ENU Exam Online** can solve your doubts and questions at any time, Do you have bought the Huawei pdf version for your preparation?

100% Real H12-831_V1.0-ENU Huawei Exam Training Questions pdf, Somebody must have been using Tinova-Japan dumps, Tinova-Japan can satisfy the fundamental demands of candidates with concise layout and illegible outline of our H12-831_V1.0-ENU exam questions.

We know that H12-831_V1.0-ENU exam is very important for you working in the IT industry, so we developed the H12-831_V1.0-ENU test software that will bring you a great help.

Compared with companies that offer a poor level of customer service, our H12-831_V1.0-ENU exam questions have over 98 percent of chance to help you achieve success, So speedy that you may not believe it!

So far, our H12-831_V1.0-ENU exam training torrent gradually wins a place in the study materials providing, If you want to pass the shortest time to pass you exam, just find us.

Our Certification Exam Questions and Answers with APP Exam Simulator contains Real Questions, Our H12-831_V1.0-ENU exam dump can give you an opportunity to enter the IT industry.

Test engine: study test engine can be downloaded and run on your own devices, We also pass guarantee and money back guarantee for your failure of the exam after using H12-831_V1.0-ENU exam dumps.

Our society needs all kinds of comprehensive talents, the H12-831_V1.0-ENU latest preparation materials can give you what you want, but not just some boring book knowledge, but flexible use of combination with the social practice.

H12-831_V1.0-ENU exam collection guarantee your exam success.

NEW QUESTION: 1

A company uses Dynamics 365 Supply Chain Management. A machine on the manufacturing floor breaks down. A senior technician located at another plant has been trying to help diagnose the problem over the phone. The technician is not able to help the onsite technician make the appropriate fix. You need to recommend a solution that allows the senior technician to provide visual guidance to the onsite technician. What should you recommend?

- A. Layout
- B. Remote Assist
- C. Power Virtual Agents

Answer: B

NEW QUESTION: 2

Amazon EC2 instances are categorized into different types based on their pricing model and usage. Which instance type is designed for applications that require a consistent level of capacity over a long period of time?

- A. Scheduled Reserved Instances
- B. On-Demand Instances
- C. Spot Block Instances
- D. Reserved Instances

Answer: A

Explanation:

Explanation

Scheduled Reserved Instances

Scheduled Reserved Instances (Scheduled Instances) enable you to purchase capacity reservations that recur on a daily, weekly, or monthly basis, with a specified start time and

duration, for a one-year term. You reserve the capacity in advance, so that you know it is available when you need it. You pay for the time that the instances are scheduled, even if you do not use them.

Scheduled Instances are a good choice for workloads that do not run continuously, but do run on a regular schedule. For example, you can use Scheduled Instances for an application that runs during business hours or for batch processing that runs at the end of the week.

If you require a capacity reservation on a continuous basis, Reserved Instances might meet your needs and decrease costs.

How Scheduled Instances Work

Amazon EC2 sets aside pools of EC2 instances in each Availability Zone for use as Scheduled Instances. Each pool supports a specific combination of instance type, operating system, and network.

To get started, you must search for an available schedule. You can search across multiple pools or a single pool. After you locate a suitable schedule, purchase it.

You must launch your Scheduled Instances during their scheduled time periods, using a launch configuration that matches the following attributes of the schedule that you purchased: instance type, Availability Zone, network, and platform. When you do so, Amazon EC2 launches EC2 instances on your behalf, based on the specified launch specification. Amazon EC2 must ensure that the EC2 instances have terminated by the end of the current scheduled time period so that the capacity is available for any other Scheduled Instances it is reserved for.

Therefore, Amazon EC2 terminates the EC2 instances three minutes before the end of the current scheduled time period.

You can't stop or reboot Scheduled Instances, but you can terminate them manually as needed. If you terminate a Scheduled Instance before its current scheduled time period ends, you can launch it again after a few minutes. Otherwise, you must wait until the next scheduled time period.

The following diagram illustrates the lifecycle of a Scheduled Instance.

<https://docs.aws.amazon.com/AWSEC2/latest/UserGuide/ec2-scheduled-instances.html>

NEW QUESTION: 3

Smith works as a Network Administrator for HCP Inc. He sets up a DNS server on the network and enables DNS service on all computers. However, DNS is not working properly. Which of the following commands should Smith use to verify the DNS configuration?

- A. tracert
- B. nslookup
- C. pathping
- D. ping

Answer: B

NEW QUESTION: 4

Which statement describes the information returned by the DBMS_SPACE.SPACE_USAGE procedure for LOB space usage?

- A. It returns space usage of only SecureFile LOB chunks.
- B. It returns both BasicFile and SecureFile LOB space usage for only nonpartitioned tables.
- C. It returns both BasicFile and SecureFile LOB space usage for both partitioned and nonpartitioned tables.
- D. It returns space usage of only BasicFile LOB chunks.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

SPACE_USAGE Procedures

The first form of the procedure shows the space usage of data blocks under the segment High Water Mark. You can calculate usage for LOBs, LOB PARTITIONS and LOB SUBPARTITIONS. This procedure can only be used on tablespaces that are created with auto segment space management. The bitmap blocks, segment header, and extent map blocks are not accounted for by this procedure. Note that this overload cannot be used on SECUREFILE LOBs.

The second form of the procedure returns information about SECUREFILE LOB space usage. It will return the amount of space in blocks being used by all the SECUREFILE LOBs in the LOB segment. The procedure displays the space actively used by the LOB column, freed space that has retention expired, and freed space that has retention unexpired. Note that this overload can be used only on SECUREFILE LOBs.
