NEW QUESTION: 3

Answer:

Explanation:

Explanation

* `addEventListener`

The `addEventListener()` method attaches an event handler to the specified element.

In context of a worker, both `self` and `this` refer to the global scope. The worker can either add an event listener for the message event, or it can define the `onmessage` handler to listen for any messages sent by the parent thread.

* `postmessage`

Pass a message to the worker.

* `close()`

Terminating Workers

Workers are resource-intensive; they are OS-level threads. Therefore, you do not want to create a large number of worker threads, and you should terminate the web worker after it completes its work. Workers can terminate themselves, like this:

```
self.close();
```

NEW QUESTION: 4

Which of the following is a benefit of using the AWS Cloud?

- A. Ability to focus on revenue-generating activities.
- B. Permissive security removes the administrative burden.

- C. Choice of specific cloud hardware vendors.
- D. Control over cloud network hardware.

Answer: A

Explanation:

Developer and IT staff productivity accounted for nearly 30% of overall financial benefits. The remaining benefits were driven by the flexibility and agility of Amazon cloud infrastructure services, which make it easier to trial new business models, support revenue-generating applications, and provide more reliable services to end users.
