Answer: C,D

Explanation:
Autonomous Database is an Oracle Managed and Secure
environment.
A physical database can't simply be migrated to autonomous
because:
- Database must be converted to PDB, upgraded to 19c, and
encrypted
- Any changes to Oracle shipped privileges, stored procedures
or views must be removed
- All legacy structures and unsupported features must be
removed (e.g. legacy LOBs) GoldenGate replication can be used
to keep database online during migration
