Explanation:

C: You use the Scenario and Version dimensions to create individual plans to be reviewed and approved.

Each scenario/version combination contains its own set of data for the accounts and other dimensions of each entity. After users complete data entry for an entity for a specific scenario

and version, they can submit or promote the data for the entity to another user for review and approval. The intersection of entity, scenario, and version is referred to as a planning unit. Planning tracks the status of each planning unit as it moves through the review process.
