- A. 0
- B. 1
- C. 2
- D. 3
- E. You cannot use :SYSTEM.MESSAGE\_LEVEL to suppress all system messages

**Answer: E**

Explanation:

Explanation: Controlling System Messages

You can prevent system messages from being issued, based on their severity level.

FormsBuilder classifies every message with a severity level that indicates how critical or trivial the information is; the higher the numbers, the more critical the message. There are six levels that you can affect.

Note: Suppressing Messages According to Their Severity

In a trigger, you can specify that only messages above a specified severity level are to be issued by the form. You do this by assigning a value to the MESSAGE\_LEVEL system variable. Form then issues only those messages that are above the severity level defined in this variable. The default value for MESSAGE\_LEVEL (at form startup) is 0. This means that messages of all severities are displayed.
